

Fiery E-41A Total Flow Color Packages

for the Ricoh Pro C651EX, Pro C751 EX, Pro C751

Sell the Right Tools for Any Customer's Needs

Give your production printing customers new ways to produce high-quality output by bringing the right combination of tools for their needs.

Total Flow Color Standard Type E-41A Package

This package caters to customers looking for accurate calibration tools to keep color consistent at all times, speed up prepress tasks on page layout and improve their image quality. The package provides solutions for on-the-fly image correction, calibration, spot color matching, softproofing and document imposition.

Total Flow Color Advanced Type E-41A Package

This package is ideal for customers that need to achieve high color quality and productivity. It addresses their needs with powerful color management, measurement and profiling tools. It also speeds up their production by automating their workflow, plus offering composition and imposition tools for complex job requests.

Total Flow Color Advanced Plus Type E-41A Package

In addition to the same components as the Color Advanced Package, it comes with the iO Automation Table to make profiles much faster with Color Profiler Suite.

Fiery Color Standard Type E-41A

- EFI ES-1000 spectrophotometer
- Fiery Graphic Arts Package
- Fiery SeeSequence Impose

Fiery Color Advanced Type E-41A

- Graphic Arts Package, Premium Edition
- Fiery Color Profiler Suite with ES-1000
- Fiery SeeSequence Impose
- Fiery SeeSequence Compose

Fiery Color Advanced Plus Type E-41A

- Fiery Graphic Arts Package, Premium Edition
- Fiery Color Profiler Suite with ES-1000
- iO Automation Table
- Fiery SeeSequence Impose
- Fiery SeeSequence Compose

Fiery Options

Provide flexibility and scalability: Fiery options meet your customers' requirements now and in the future.

For data sheets on each of these options go to www.efi.com/FieryOptions.

Fiery Options	
EFI ES-1000 spectrophotometer	Is a handheld measurement device that helps your customers produce predictable color. - Connects to Fiery controllers with a USB cord. - Quickly calibrates the output device to produce reliable color. - Produces accurate spot colors from a physical swatch and includes them in the controller's spot color library for fast and easy printing.
Fiery Graphic Arts Package	Offers professional-level tools for managing color, proofing and controlling workflow to deliver accurate and repeatable color every time. - Comes with softproofing features for precise simulation of the final output. - Includes Image Enhance Visual Editor for on-the-fly correction of individual images. - Offers Paper Simulation to show what the document's color looks like on the actual paper used in production. - Provides Halftone Simulation for proofing of the final printed dot pattern. - Comes with TIFF/IT Hot Folder Filter for simple drag-and-drop or print-to-file action. - Recombines an unlimited number of plates into one composite color print, when printing separations using Unlimited Separations.
Fiery Graphic Arts Package, Premium Edition	Provides expert users with integrated, advanced color tools for managing color, meeting industry standards, proofing and controlling workflow. - Includes ImageViewer for powerful softproofing and includes color wheel for editing colors. - Offers expert proofing tools, such as Paper Simulation Editing, Halftone Simulation, 2-Color Print Mapping, Configurable Auto-Trapping, and Progressives, to produce accurate proofs and output. - Automates sending print files to a Fiery controller through simple drag-and-drop or print-to-file function via Filters for Hot Folders. Includes a set of expert-level filters (CT/LW, TIFF/IT, EPS, PS, PDF, DCS2, 1-bit TIFF, PDF2Go, ExportPS, JPEG, PDF/X-1a and PDF/X-3 preflight). - Offers a highly customizable Control Bar that displays job and color information. - Automatically performs a series of checks to eliminate errors using Preflight, while Postflight provides diagnostics for troubleshooting problem files.
Fiery Color Profiler Suite	Provides easy, integrated color management tools that guarantee color reproduction is always accurate, consistent and reliable. - Enables creation of custom ICC printer profiles with Printer Profiler. - Allows creation of ICC profiles for CRT, LCD and laptop displays with Monitor Profiler. - Produces fully compatible ICC profiles by connecting the source and the destination with Device Linker. - Lets your customer fine tune profiles with Profiler Editor, while Profiler Inspector compares the input and output profiles of devices and determines if there are colors outside the printer's color capability. - Compares proofs against a standard with Color Verifier.
iO Automation Table	- Measures all color patches simply and easily by mounting the ES-1000 on the automatic robotic arm of the scanning table. - Helps to decrease the time spent creating device profiles and calibrating, by improving the accuracy and efficiency.
Fiery SeeQuence Impose	Automates and streamlines labor-intensive prepress tasks for greater productivity and efficiency. - Works with Command WorkStation® interface and remotely on Windows® and Macintosh clients. - Increases productivity by creating unlimited user-definable imposition templates. - Extends driver-based imposition capabilities offered by Booklet Maker and includes content editing capabilities without modifying native files. - Simplifies variable data printing (VDP) by imposing multiple records of a variable length in specific sequences to produce many applications and personalized materials, including books, coupons and business cards.
Fiery SeeQuence Compose	Offers intuitive tools that make advanced document preparation simple and quick. - Creates tabs and specifies mixed media from a single, integrated visual interface. - Simplifies document set-up and navigation in large jobs with a page view panel. - Offers quick and easy set-up of page ranges within documents, including chapter definition. - Provides simple merging of PDF pages with drag-and-drop PDF insertion.
