- Performance improved up to 148 % RIP speed.

Upgrade Kit for Xerox® EX 560 Print Server

This new hardware / software upgrade offers new and enhanced Fiery System 10 features that boost efficiency and provide flawless integration for enterprise environments.

Eliminate Redundancies with Optimized Workflow

- **Server Job Presets** – Manage the most commonly used settings centrally and share them with all users to minimize repetitive tasks.

Deliver Superior Print Output with Advanced Functionality

- **Image Enhance Visual Editor 1.1** – Allows on-the-fly image-editing without the need to open the file in the originating application. New saturation and definition controls sharpen images and enhance flesh tones.

Achieve Tight Integration for Increased Efficiency

- **PrintMe® Cloud Printing** – Allows users to email documents to print@printme.com for free and then print them through the MFP control panel using a release code.
- **Xerox® Remote Services Integration** – Enables direct communication with Xerox Communication Servers even when using single IP network setup. Provides automated reporting for usage, consumables and diagnostics.
- **Xerox® Standard Accounting Integration** – Allows accurate job tracking and easy access to data.
- **Full Xerox Extensible Interface Platform® (EIP) Support** – EX Print Server's single IP connection makes it easy to integrate with Xerox® MFPs and Xerox office solutions built around EIP such as Equitrac Office®, Equitrac Express®, Nuance® ScanFlowStore, etc.

Upgrade Kit for Xerox® EX 560 Print Server, Powered by Fiery
